Lynn Steadham

These tree services have been approved by Boise City Community Forestry to perform work (pruning, removal etc.) on trees on the public rights-of-way. To be licensed, each of these companies must employ at least one individual currently certified as an arborist by the International Society of Arboriculture (ISA). ISA Certified Arborists have completed an extensive exam relating to safety, and the growth and healthy maintenance of trees. In addition, our own arborists examine their work to help assure tree care. Finally, proof of adequate insurance (minimum \$500,000) against property damage is required prior to licensing. Community Forestry feels these requirements will help protect the trees, the arborists and the property owner.
