

2005 EnviroGuard Company Profile

Small Business Category

NEW LIFE OFFICE is a company that specializes in the remanufacturing of modular workstations since 1991. New Life Office purchases surplus workstations and revitalizes them with fabric and finishes to look new. Refurbishing and reusing these workstations saves landfill space and provides customers with affordable, high quality office interiors.

Pollution prevention efforts at NEW LIFE OFFICE include:

- 843 panels and 1026 storage components have been refurbished and reused since January 2005.
- All three high pressure laminate manufacturers used are Greenguard certified.
- All paints used are low VOC, water reducible enamel.
- Terratex fabrics are made from 100% recyclable or compostable materials.
- Office supplies such as hanging file folders, manila folders, tape dispensers, and staplers that are part of surplus purchases are reused by office staff or donated to businesses and schools.
- Newspaper, office paper, and printer cartridges are recycled.
- Printer and copy paper is made from farmed eucalyptus trees and both the paper and its packaging are 100% recyclable.
- Fabric from old modular panels is removed and reused as packing material.
