

BUILDING PROCESS

DID YOU KNOW?

All building applications are submitted electronically. Applicants can schedule an appointment with a plan reviewer at [PDS Appointments](#).

- 1. SUBMITTAL:** Building application is submitted on the [City of Boise Permitting and Licensing system](#). The applicant uploads documents and corrections in the ePlanReview system. Additional contacts can be attached to the application at the time of submittal.
- 2. PRESCREEN:** Intake staff will review the application and plans for completeness and contact applicant for corrections if necessary. Public Works will review all hillside applications.
- 3. REVIEW:** Once the prescreen is completed, the building review begins. Building review cycles on [ePlanReview](#) often include corrections for the applicant to make. Requests for corrections or additional documents from city staff will be emailed to the applicant

- 4. ISSUANCE:** Once building reviews are passed and completed, all remaining fees are assessed, and plans receive an Approved stamp. Applicant is emailed when the permit is ready for fee payment and issuance. Trade permits are obtained separately.

Fees for the building permit and all other related permits are due prior to issuance.

- 5. INSPECTIONS:** Inspections are scheduled by the applicant or contractor in the [Permitting and Licensing system](#). Trade permits attached to the building permit must be finalized prior to the final building inspection taking place. Inspectors may require corrections.

Re-inspection fees may be charged for repeat trips when not ready.

Corrections Required

Inspections require corrections and re-inspection.

OR

Plan Modifications

Significant design changes require a plan modification, and the process starts back at Submittal. Additional fees may apply.

OR

Pass

All inspections pass and permits are finalized. Project has been approved.
