PARKS AND RECREATION

RAMAKER PARCEL: *SPECIAL MANAGEMENT CONSIDERATIONS*

This parcel was purchased through a donation and sale agreement between the City of Boise many non-profits, community groups, and individuals. Over 75% of the purchase price was generated through private gifts. As such, this is a unique reserve property with special considerations:

-  **This parcel is subject to possible seasonal closures associated with the management of the Idaho Fish and Game Boise River Wildlife Management Area.**
-  **Due to the desire for this property to serve as an interpretive trail and the importance of the surrounding critical wildlife habitat, dogs will be required to be on-leash in this reserve.**
-  **The trail opportunity offers a short, pedestrian-only interpretive loop.**
-  **There will not be trail connectivity on the south or east portions of the site because adjacent lands are either privately held or are state lands chartered to protect wildlife habitat. The trail is accessible from the Barber Valley Trail Network.**
