As of January 1, 2006, the Idaho State Statute 54-5209 requires that:

No building inspector or such other authority of any county, municipality or district charged with the duty of issuing building permits or other permits for construction of any type shall issue any type of permit without first requesting presentment of an Idaho contractor’s registration number; provided however, a permit may be issued to a person otherwise exempt from the provisions of this chapter provided such permit shall conspicuously contain the phrase ‘no contractor registration provided’ on the face of such permit.

To comply with this state statute, Planning and Development Services requires a registration number be supplied with this permit application. A permit application is incomplete without this information, and cannot be processed until a registration number is provided, or the permit applicant declares themselves to be exempt per the exemptions listed in Idaho State 54-5205.

Agreements

Who is performing the work on this permit?:
- [ ] Homeowner or Other Exempt
- [ ] Registered Contractor

I am not providing a Contractor Registration Number because

Certificate of Value

Declared Value: - Declared Value is the total value of all construction work for which the permit is issued (including overhead and profit).
Each application allows for the replacement, repair or installation of new materials. Structural modification are not allowed under this application and will require a separate permit (#406 Residential Additions/Alteration or #520 Commercial Major Tenant Improvement) and Plan Review approval. Structural modifications include but are not limited to the following, alteration of window openings, replacement of roof trusses, interior roof drains or mechanical installations.

Residential window replacements must comply with the City of Boise Window Replacement Policy.

Roof coverings and siding materials installed in the hillside area or Wildland Urban Interface (WUI) area must be non-combustible as regulated by the City of Boise Fire Prevention Code. Roofing materials are limited to a maximum of 2 layers.

Modifications to structures located within a Historic or Design Review overlay require a review prior to issuance and may require additional approval by the Planning Division. Please visit the Planning Division website for further details.
