## Foothills Levy Conservation Efforts at Work

### Protecting Your Open Space

Using \$13.4 million of voter-approved funds, the Foothills Conservation Advisory Committee has worked to protect over 10,750 acres of land through acquisition, donation, conservation easement, or land exchange. These lands represent a fair market value of \$37.4 million. With \$1.8 million remaining, our efforts will continue to focus on protecting critical wildlife habitat, riparian corridors, rare plants, historic sites, and potential trail connections.
