Burn Awareness Preventing Burn Injuries
Brewster needs your help! He’s forgotten all of his bathroom safety rules and filled the tub with hot water! Now he’s about to jump in! We know that you add COLD water first, then HOT, then make sure a parent checks the water temperature before you get in!

Be Safe in the Bathroom!

Here’s Boots the bear - he’s burn aware! And helpful, too! He’d love to share some super safety tips with YOU! His best pal, Brewster, could use some, too!

Oh, NO!

Brewster needs your help! He’s forgotten all of his bathroom safety rules and filled the tub with hot water! Now he’s about to jump in! We know that you add COLD water first, then HOT, then make sure a parent checks the water temperature before you get in!

UH-OH!
Rubber Duck Differences!

These rubber ducks may look the same, but they're not! Can you find the seven differences between them?

Pop all the bubbles with the letter ‘B’ on them! Then unscramble the letters on the remaining bubbles to find out what you should stay away from in your bathroom.

Add hot water to the tub.
Test the water temperature.
Run cold water in the tub.

Answers: Differences: Beak, eye, eyebrow, water, hair tufts, tail feathers, wing; Bubbles: Hot water!; Bath: 2, 3, 1.

These pictures show the safe way to prepare a bath. Can you number them in the correct order?

1. Have your parents check the water temperature of your bath before you get in.
2. In the bathtub, sit away from the faucets.
3. Do not use the bathtub on your own.

Safety Fact:
Approximately 16,000 children under age 5 are treated in U.S. hospitals for scald burns annually.
Brewster is in such a hurry to grab his skateboard and get outside that all his kitchen safety rules have slipped his mind! Let’s remind him that we don’t run or play in the kitchen - especially when someone is cooking! Can you spot any other safety hazards in this kitchen?
Never play in the kitchen when someone is cooking. Do not touch or pull on electrical cords. Do not reach for items on kitchen counters.

Boots has spotted a safety hazard in the kitchen! Help him find the dangling cord that leads to the hot kettle. Is it 1, 2, 3, or 4?

Safety Fact: Approximately 65 percent of children under age 4 who were hospitalized for burn injuries were scalded by hot liquids.
It looks like Brewster needs another safety reminder. He’s found some things that should not be played with. Let’s help him to be safe before it’s too late! Leave those matches alone, Brewster! Stay away from open flames and DO NOT touch red gasoline containers!

Gulp!

That was close! But Brewster’s just fine. Thanks to you, he learned in time that it’s safety first! Be burn aware at home or school like Boots the bear!
Help Brewster find his way through the maze by making safe choices. Let’s see what he’s learned! At each step, choose the safest option and follow that route. If you're right, you'll move Brewster to the next question. If you're wrong, try again!

Start

If you see a red gasoline container, do not touch it or try to open it. If you smell gasoline vapors, leave the area and tell an adult.

Nearly 50 percent of children injured in fires or fire-related incidents are under age 5.

Safety Tips:
1. If you see a red gasoline container, do not touch it or try to open it.
2. If you smell gasoline vapors, leave the area and tell an adult.

Safety Fact:
Nearly 50 percent of children injured in fires or fire-related incidents are under age 5.
Knowing what to do BEFORE a fire occurs can save your life! Develop a HOME FIRE ESCAPE PLAN, together with your family. Use the grid below to draw a floor plan of your house and find TWO EXITS from each room. Windows can be used as emergency exits, too! Remember to designate a MEETING PLACE at a safe distance outside your home.
